3D drawings:
the future of design

1. DESIGN STEP

2. RENDERING

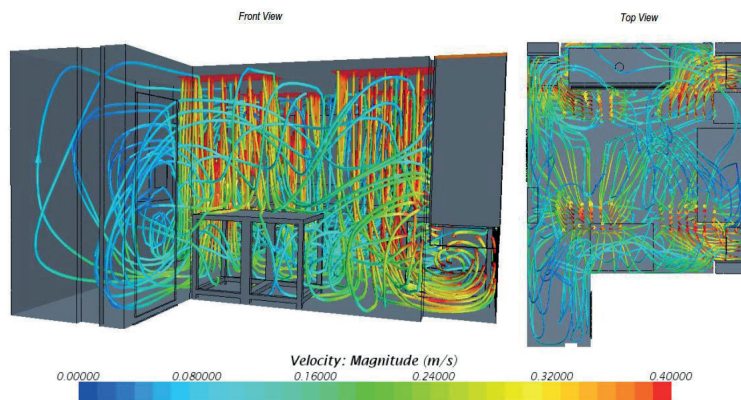

CFD

CFD computational fluids dynamic, very advanced software to simulate the air movement inside the cleanroom, helping to design ventilation system avoiding turbulence, low air speed zones, areas outside the main stream

LEAKAGE
General view

B-LAB STREAMLINES
Range 0-0.4 m/s

B-LAB – AGE OF AIR

Isosurface Time = 48 sec
(75 air changes)

The iso-surface divides the space in 2 zones:
1. Compliant air changes: age of air < 48 s.
2. Not compliant air changes: age of air > 48 s
