Subject: Letter of References

To whom it may concern,

As a head of Engineering in GINSANA SA SFI Group, we purchased Two B&D Rotary Tablet press machines for our production.

This machines were installed satisfactorily by B&D Italia engineers in 2010 and 2013

Since the commissioning of this machines, they are working stably and we have experienced a continued improvement of speed and performances.

For the capital investment versus the throughput we consider this is a good deal for our company.

We truly believe that B&D press machines have a competitive edge in the market based on their performance and value.

We plan to work closely with B&D Italia on a continual basis, and will not hesitate to purchase more machine from them as we expand our operations.

Sincerely yours

GINSANA SA
