INTRODUCTION

DEVOTED TO THE BEST

We never settle. We always aim for innovation, strength and safety. Our detailed attention through BIM design ensures the highest precision and dynamism.

Growing oncology research and the rise of cancer, diabetes and other cardiovascular diseases cases have created a sizeable demand for “high potency” drugs. Their wide use in oncology brought the need for specialized containment capabilities to protect the drug product, the operator and the environment.

Nicomac Europe answers to all these needs with a modern, safe and custom system that’s made in Europe and widely appreciated all around the world.

DESIGN

NOTHING LEFT TO CHANCE

By always having in mind safety, simplicity and ergonomics and taking in consideration variable factors such as material flow, required utilities and operator's access, we can provide the proper configuration according to the user's equipment, need and experience.

With main features including a full stainless steel structure, FDA approved materials with a high level of finishing and many transfer systems available, our isolators will always ensure a high quality, efficient and safe experience.

The isolator perfectly integrates with the NCS system

The NCS system handles any type of tablet

FEATURES

COMPLETE INTEGRATION

Nicomac Europe's NCS systems are a series of highly technological and performing coating machines that can handle any kind of tablet, process and batch size. They ensure uniform and gentle mixing, a fully automated process and a high cleanability.

The integration of the isolator will simplify the operator's work with increased efficiency and safety.
