Press release  
12th OCTOBER 2023

## Nicomac joins Mangini Group

With the acquisition of the majority shareholding of Nicomac by Mangini, a new entity is born today in Italy, among the most important in Europe in the cleanroom and OSD equipment market.

On the eve of CPhI Barcelona 2023, one of the most important international pharmaceutical event, we are pleased to make an official announcement about the successful completion of a remarkable financial transaction in which Nicomac, industry leader in modular cleanroom systems and coating and granulation equipment for oral solids dosage forms, has joined Mangini Group, an industrial company active on international markets for design, production and installation of mobile partitions and accessories with high technological characteristics provided with anti-seismic, fire-fighting, acoustic and environmental certification. Mangini operates in the Healthcare, Cleanroom, Workspace, Doors and Hospitality sectors, and also offers, with Acotec Mangini Turnkey Division, turnkey solutions, prefabricated structures and modular hospitals.

With the entry of Nicomac, Mangini Group achieves the objective of creating new synergies and economies of scale, presenting itself to the European and international market as one of the most important players capable of offering a vast range of integrated product lines: turnkey projects, clean rooms for the pharmaceutical, nutraceutical, electronics and aerospace industries, pharmaceutical and biotechnology laboratories, modular projects for hospitals, workspaces and industrial doors and complete coating and granulation lines for oral solid dosage pharmaceutical and nutraceutical forms. In regards to the North American market, all Mangini Group divisions are now represented by Nicos, Nicomac's distribution company since 1985, which has become part of the Putignano industrial group.

### **About Nicomac**

Established in 1977 in Milan, Nicomac is the market leader for modular cleanroom systems in controlled contamination environments, particularly for pharmaceutical, healthcare and life science industries, also being the only company in the industry to design and build hi-tech equipment for coating and granulation processes for the pharmaceutical and nutraceutical sector. This exceptional expertise allows the company based in Liscate, just outside Milan, to provide its customers (located in 65 countries all over the world, with around 1800 successful active projects) an integrated turnkey project management service for the creation of complete lines and systems for OSD forms.

*“After 46 years of continuous growth, I am extremely happy and proud of the integration process with Mangini group which allows our companies to position ourselves on the global market as one of the largest industrial companies for the supply of cleanrooms and pharmaceutical equipment. The wide range, quality, cutting-edge technology of products and services we are able to provide, places us as one of the strongest global groups in the sector thanks to Mangini's knowledge and innovations combined with Nicomac's history. I am proud to be part of this new group and to work with people like Massimo Mangini and his team, who I deeply respect for the expertise and passion they have always put into their work”* **Tomaso Nigris, CEO Nicomac**

### **About Mangini**

Mangini Group is an international industrial entity, with 68 years of presence on the market, specializing in designing, producing and installing mobile partitions and accessories with technological characteristics and systems according to the various sector of intervention. All Mangini Group products have seismic, fire, acoustic and environmental certification. The group operates in the tertiary sector with Mangini Workspace division, in the healthcare sector with Mangini Healthcare division, in the pharmaceutical sector with Mangini Cleanroom division and offers turnkey solutions in all areas of intervention through the Acotec division of the Mangini Group.

Mangini Workspace creates mobile partitions, meeting rooms, phone booths and furnishing accessories for management and operational offices. Mangini Healthcare designs, produces and installs partitions and false ceilings for operating rooms, intensive care, coronary units, specialized hospitalizations up to the creation of modular hospitals. Mangini Cleanroom creates partitions and false ceilings for all areas where controlled contamination environments are necessary. For over 35 years, Acotec Turnkey Division, with its team of specialized engineers, has been designing and creating, turnkey, controlled contamination and biological containment environments for the pharmaceutical, healthcare, microelectronic and aerospace sectors.

*“The operation that brought Nicomac to be part of our group allows us to achieve the objective of expanding production and commercial capacity at an international level in the cleanroom and OSD equipment sector thanks to Nicomac and Nicos' presence in foreign markets and the reputation of their brands. This important step integrates and completes our offer of highly technological solutions in the cleanroom sector. Furthermore, with Nicos USA Mangini Group strengthens the marketing and distribution of its products and systems for the American market. I am proud to be supported by the great experience and professionalism of Tomaso and Francesco Nigris”* **Massimo Mangini, Presidente Mangini Group**

**CLEANROOM  
OSD EQUIPMENT**

Nicomac and Mangini will be at  
CPhI Barcelona 2023 from 24 to 26 October at stand #3T51  
to present the new corporate structure and the main product innovations of Nicomac Cleanroom  
(HI), Coating systems (NCS) and Granulation equipment (PHD) lines, also under isolator (HP).
