INTRODUCTION

DEVOTED TO THE BEST

We never settle. We always aim for innovation, strength and safety. Our detailed attention through BIM design ensures the highest precision and dynamism.

We designed more than 135 profiles over the years, marked by innovation, mechanical resistance and compliance with CGMP design. Our panels are self-supporting and joined to each other with an innovative H profile that ensures a constant 4mm gap trimmed with food silicon.

High-standard outcomes achieved thanks to the most innovative technologies and a qualified, professional and expert team.

INTRODUCTION

HIPHARMA PRODUCT LINE

Nicomac Europe's cleanrooms meet and exceed the most advanced industry demands. Our modular systems are the winning combination between multi-annual experience, high-quality materials, constant innovation and competent technicians. Nicomac Europe guarantees quick delivery times, rapid interventions and competitive prices.

FEATURES

STYLE AND SUBSTANCE

We are Italians and doing things with style is in our nature. Nicomac Europe's cleanrooms are entirely designed into detail and show a modern elegant and appealing look in any context, always being cGMP compliant. But there's more: their modularity and components, derived from the experience of more than 1500 installations worldwide, ensures quality and flexibility, adapting to the most rigid needs. With Nicomac Europe, system safety, quality, look and functionality are always guaranteed.

Functional

Every project is designed to be safe, durable, subitizable and easily adapted thanks to its modularity.

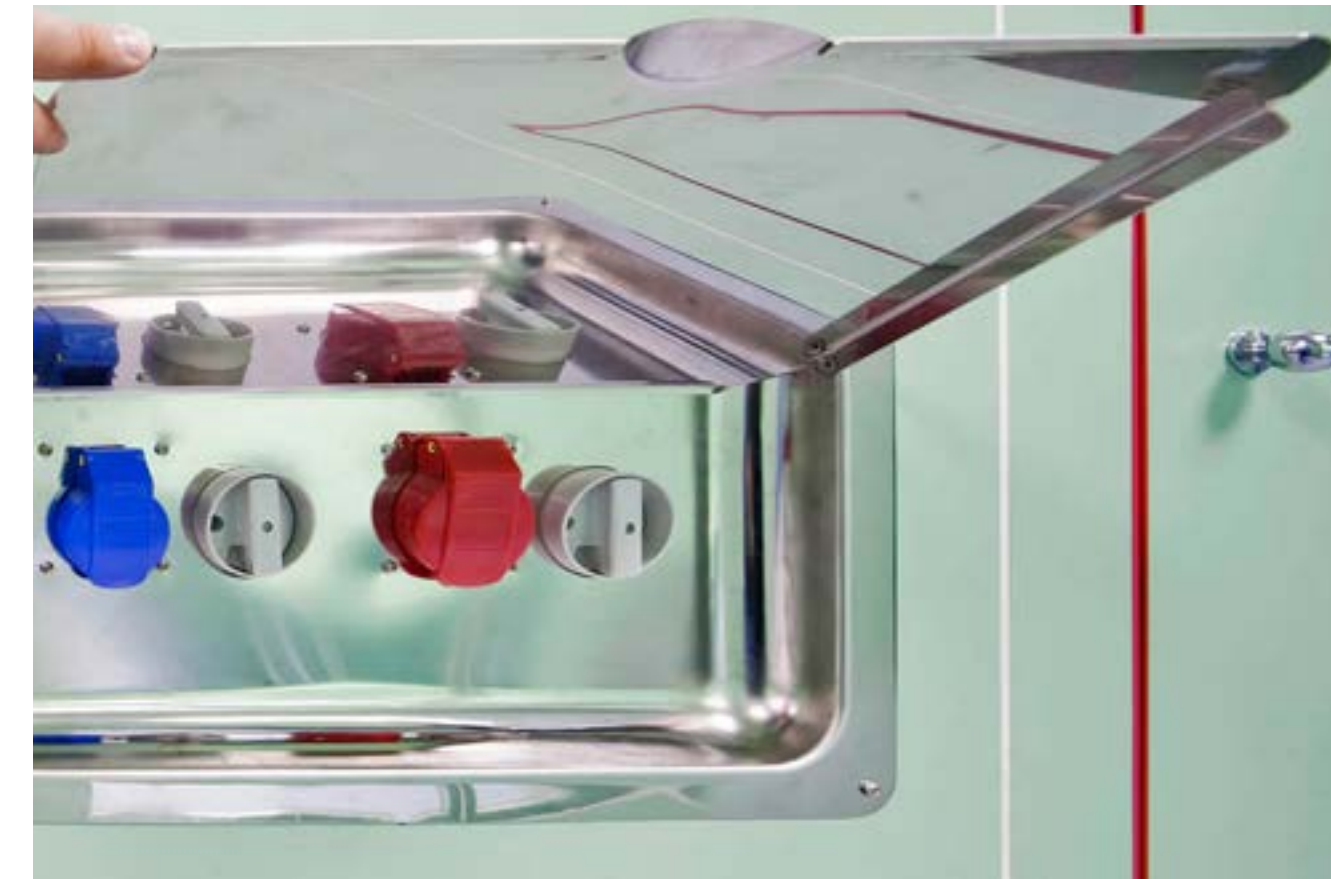

Unique

Thanks to an expert and qualified team, first-class materials and a love for things well done, every cleanroom is guaranteed to be unique, custom-made and with the highest quality from every point of view.

Certified

We leave nothing to chance. During the overall design process, anufacturing and installation, our experts and certified ISO 9001 systems ensure that everything is done to perfection.

FEATURES

READY FOR ANYTHING

We do not miss anything: manual or automatic doors, switches, lockers, mirrors, electric sockets, false column, ceilings, sinks, bumpers, lights, sensors, shoe covers and many more others to customize and complete your cleanroom environment.
