Dear Mr. Nigris

I would like to thank you for the quality cleanroom installation you provided both for Notol , 8000 m² of walls for solid form department and Ampoules , 1400 m² and 3000 m² of walls for the two injectable departments. We appreciated the attention paid and quality of the finish details and how you organized the project.

Krka confirm that HPL, High Pressure Laminate, walls, used for both projects, have great advantages compared with metal panels: HPL walls are according to cGMP, high mechanical resistance, easy cleanliness and no particle release.

It has truly been a pleasure to work with Nicomac, a good coordination and organization between Krka and Nicomac staff allow a great result and I look forward working with Nicomac on future projects

Sincerely,

Smiljan Pavisic
Assistant Technical Director
