

Francesco:

Thank you for sending us the name change notice for your company. We will update our files accordingly. We remain very impressed with the Nicomac (Nicos Group) modular system used in our first sterile facility.

Samuel Tang may have already informed you that PharmaForce has aggressive growth plans for the near future. This growth includes an active pharmaceutical manufacturing facility and a second sterile finished dose facility. It is our hope that Nicos Group will be in a position to assist and supply modular systems to these new facilities with the same high quality and service as we have experienced in the past.

We will look forward to working with the Nicos Group and wish you much success.

Regards,

- Mike
